Art Unit: 1774

1. Applicants election of claims 1-10 on 6-2-05 is acknowledged. Applicants traversed the restriction and contend the searches and examination of the entire application would not be a serious burden to the office. The examiner disagrees. The searches for the distinct and separate inventions would require different search strategies an evident by their different classifications. The examiner further notes applicants desire to cancel the non-elected claims.

2. Claims 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims it is not understood how the veil elongation changes whenever compression molded. It would appear the elongation would remain constant during any compression molding. Are the molding sequentially done?

3. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants are reminded of the use of trademark name "Vinamul 7700" in the claims.

Applicants are requested to make related correction to the claim.

4

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/670,039

Art Unit: 1774

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Page 3

5 .

Claims 1,2 and 4-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamaji et al(US 4923547).

The cited reference teaches the claimed invention including a conformable veil comprising a plurality of fibers having identical lengths and a polystyrene based binder applied thereto-col 2, lines 59-66; col 3, lines 1-6; col 8, lines 55-64. concerning claim 2, the reference teaches similar fiber lengths in col 2, lines 61; col 5, lines 64-66; col 6, lines 12-14. concerning claim 4, the reference teaches glass fibers in col 2, lines 54. concerning claim 5, the reference teaches polystryrene binder in col 3, line 4. concerning claim 6, the reference teaches the polysterene emulsion, Vinamul 7700 in col 3, lines 1-4 (It is noted polystyrene emulsion is Vinamul 7700- see accompanying US 3963820 reference; col 9, lines 16-18). Concerning claim 7, the reference teaches claime diameter in col 5, lines 65-67. the binder is also dissolved in a resin. Concerning claims 8-10, the reference would indeed possess the claimed elongation when compression molded as such properties would be inherent.

6

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1774

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

7

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaji et al(US 4923547) as applied to claims 1,2 and 4-10 above, and further in view of Kuwazuru et al(US 4579774).

The reference to Kuwazuru et al teaches the aspect of including binder material in fiber impregnated product as taught by Yamaji et al- col 4, lines 16-39; col 6, lines 44-55. it would have been obvious to one of ordinary skill in the art at the time the invention is made to combine the teaching of Kuwazuru et al and provide specific amount binder material for the impregnated product taught by Yamaji et al , in the absence of unexpected results and motivated by the desire to impart desired characteristics thereto – col 4, lines 5-15. the references are combineable for they relate to impregnated fibrous material.

8

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Blakey(US 3963820), Reiterer et al(US 6746974 B1) and Bean et al(US 6743522 B2) are cited of interest for their respective teachings as set forth and additionally to show the state of the art.

Art Unit: 1774

Applicants who wish to send a facsimile (draft copies) for the examiner's immediate review can do so by using the Examiner's personal fax number at 571-273-1520. The faxing of all papers must conform with the notice published in the Official Gazette, 1096 O.G. 30 (November 15, 1989). NOTE: All facsimiles sent to the examiner's personal fax number should be in draft-forms and will be treated as informal.

Same facsimiles will not be entered in the related applications unless otherwise agreed and noted by the examiner.

The fax number for all other fascimile is 703-872-9306.

Information about **the status of an application** may be obtained from the Patent Information Retrieval system (**Private PAIR**).

Status inquires for **published applications** may be retrieved from either **Private PAIR** or **Public PAIR**. Questions about the PAIR system should be directed to the Electronic Business Center at **866-217-9197**.

Any questions concerning the instant communication should be directed to Examiner Dixon, at 571-272-1520, Mondays to Thursdays, between 12 noon and 8 PM, eastern time. The examiner's supervisor, Mrs. Rena Dye, can be reached at 571-272-3186.
